Why use a LINK broker to market your business?

LINK has one of the most comprehensive and sophisticated databases of business sales in the country. We have been tracking and analysing trends for many years.

We are also one of the only companies to conduct regular independent research to determine the motivations of potential buyers and identify the key issues that are important to them.

Confidentiality and integrity

Most businesses have commercially sensitive information which must be guarded from competitors, staff, customers and suppliers.

By acting as intermediaries, LINK ensures that every enquiry about your business is carefully vetted.

Furthermore, no information that could identify your business is released to potential purchasers without your approval and until a Confidentiality Agreement has been signed.

Involvement at all stages

Statistics show that a significant number of all business sales fail during the due diligence process.

This is not the case with LINK. Our brokers work with you right throughout the process, managing issues as they arise and facilitating negotiations to smooth the way to a successful sale.

LINK's brokers will ensure that you are fully conversant with all facets of the business sales process, and will act as a facilitator between you and potential buyers (and often, their legal and accounting advisors).

Keeping you informed

LINK brokers have access to sophisticated research and analysis software that enables us to provide valuable insights into the progress of your business sales programme.

LINK provides detailed feedback covering marketing activity, level of enquiry, prospect profiles and comment, website tracking and a host of other factors.

It also allows for the marketing campaign to be refined or adjusted to maximise effectiveness and keeps you completely informed of the campaign's progress.
